

JAE Launches DX07 Series Video

JAE has launched a new video highlighting our USB Type-C connector and cable options that meet the requirements of next-generation advanced electronic computing devices. Kenta Minejima narrates how the DX07 Series supports standards from USB 2.0 data and charging to more high-performance standards like IPX7 or USB4. Featuring live clips of JAE manufacturing and design throughout, this video provides a high-level demonstration of the DX07 series, the various USB Type-C standards it supports, and overall JAE advantage.

This video is the first of a planned series of videos covering the USB Type-C Series. It is available on our [YouTube](#) channel and [LinkedIn](#) page, in an effort to further promote this innovative new series to the market. Please click [here](#) to view the video in its entirety.

If you have any questions regarding this matter, please contact your JAE account manager.
Thank you for your cooperation.
